

# Guide to math class for aliens

By: Kareem Robinson

# Getting Prepared

**As directed by law (in our society laws are the rules we follow to slow the progress of the extinction of our race's sanity) all children of age 5 or older have to go to math class. So let's set you up! You'll need a pencil for writing and stuff. Paper so you can write stuff on it and that's pretty much it.**

# What To Do When Your In Class

**When you enter class you'll see human who is a bit taller than the rest in the room you'll look to her for directions, questions, and other things. You'll see a desk(wood on top of some metal/more wood) next to a chair(a wood thing that's possible to put your gluteus maximus on a flat wood area. That's where you wanna set all your stuff until class begins.**

# Curriculum

At this age for humans you begin basic math which is counting. You'll begin learning numbers from 1-100.(There is a group of 3 aliens. 1 more alien joins. How many are there? A simple question your teacher may ask you and your expected to know no matter your race or species.

**100 NUMBER CHART**

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100
